compact, wireless & mobile – fastlane ultrasound

Non-invasive internal visualisation at any time, any place.

Compact

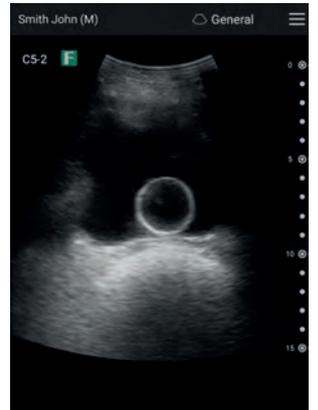

Fits your hand and pocket

Wireless

Decrease cable disconnection and infection risks

Mobile

At the bedside, in the emergency room, in the field

fast & accurate – get a clear picture

High quality clinical images in no time.

Fast

Clinical examinations on the spot

Accurate

High quality with Clear Visualisation image processing

Automated

Artificial Intelligence assistance

wireless & limitless – clinical application examples

 **Emergency medicine**
Fast lung scans for quicker diagnosis

Sports medicine
Musculoskeletal and soft tissue structure injury or disease diagnosis

Intensive care
Peripheral venous puncture mode with Centreline Display for precise vascular access

Vascular
Blood flow evaluation with Colour-Mode Scan; Peripheral venous scans with greater confidence

Gastroenterology
Rectum observation, liver biopsy guidance

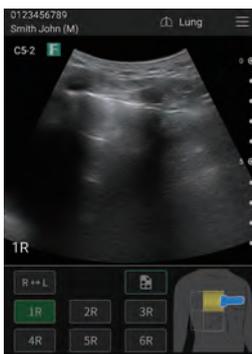

Pediatric and neonatal care
Non-invasive and precise anatomical structure analysis

Urology
Automated bladder urine volume measurement with Artificial Intelligence

Obstetrics & Gynecology
Transabdominal assessment of uterus, ovaries or adnexa; analysis of fetal anatomy and amniotic fluid

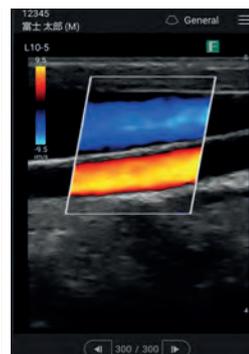

Lung Scan mode

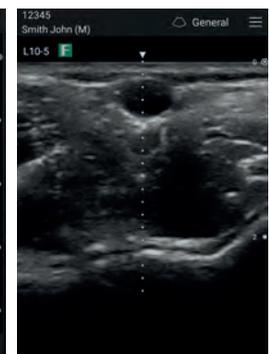

Rectum Observation mode

Urine Volume Measurement mode with AI

Blood flow evaluation with Colour-Scan mode

Peripheral Venous Scan mode function*

*Peripheral venous puncture mode can only be used with linear transducer.

wireless transducers for every purpose

FWT C5-2 Convex

Examinations with reduced burden on patients and healthcare professionals:

- Gastro
- Internal Medicine
- Urology
- Obstetrics
- ER/ICU
- General Medicine / Home visit / Rehabilitation

Probe weight
190g

FWT L10-5 Linear

Greater confidence in performing physical examination and puncture:

- Shunt dialysis, venipuncture, IMT
- Feeding tube insertion
- Musculo-skeletal evaluation

Probe weight
147g

Tablet display unit

Pocket-sized & light-weight with LCD touch screen, for accurate and fast visualisation.

Tablet weight
177g

“AI/Deep Learning” assistance function
